

SpinTORQ

360° Continuously Rotating Torque Wrench

- **More than 36 times faster at nut turn than ratcheting wrenches**
- **Full power forward and reverse**
- **Hydraulic, electric and pneumatic models**
- **Patented design**
- **Fits tight spaces**
- **Custom sizes available**

There's only one like it in the world!

When speed matters, only one torque wrench blows all the others out of the water: SpinTORQ.

SpinTORQ is the only low-profile, continuously rotating torque wrench available today. It provides 360-degree continuous rotation at incredibly fast speeds that are from 36 to more than 100 times faster at turning a nut than ratcheting hydraulic wrenches.

Pair this speed with SpinTORQ's ability to deliver full power in both forward and reverse, and you have dramatic timesaving benefits.

Ratcheting hydraulic wrenches only rotate the nut 10 to 15 degrees for each extension of the cylinder. Each time the cylinder extends, the power unit must build pressure. This tedious process makes turning a nut a very slow ordeal. SpinTORQ's hydraulic and pneumatic models don't understand the meaning of slow. With their continuous turn, they build pressure one time! The

SpinTORQ electric model is even faster since it doesn't rely on a pressurized system.

A specially designed, double-enveloping worm gear gives SpinTORQ the power to get the job done fast. SpinTORQ never locks up and is removed with ease.

Why is speed and power so important?

Time is money!

Everyone knows that dive time is expensive. A subsea flange that normally takes two hours to make-up with a hydraulic ratcheting wrench can be completed in less than 30 minutes with the SpinTORQ!

The SpinTORQ is a game changer in shutdown/turnaround situations where multiple flanges must be bolted and equipment needs hydrostatic testing to bring a unit back online. SpinTORQ has the power to bring any unit back online a full day or more earlier than scheduled. This can easily add up to millions of dollars in profit!

Applications and specifications

With a size range that covers most applications, SpinTORQ is:

- Perfect for subsea and surface projects.
- Customizable for special projects.

SpinTORQ's 3,000 psi system easily adapts to ROVs without the use of a hydraulic hose down line.

The durability of a stainless steel body and the dependability of the FASTORQ Total Assurance Guarantee ensure you not only get innovation but reliability when you purchase a SpinTORQ. All SpinTORQ models are covered for three years with the added benefit of free warranty extension with our annual free inspection and calibration program.

To make your SpinTORQ even faster and more productive, pair it with FASTORQ's 603A Power Unit.

Don't let ratcheting hydraulic torque wrenches slow your project down any longer. Save time and money with SpinTORQ.

**Total
Assurance
